

Shreedhar Anand

Software Development Engineer – Backend Systems

+91-9060749243 | anandshri@iiitmanipur.ac.in | LinkedIn | GitHub | Portfolio

EDUCATION

Indian Institute of Information Technology Senapati, Manipur

B.Tech in Computer Science and Engineering; CGPA: 8.01

Aug 2022 – May 2026

Imphal, India

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL

Backend: Node.js, Express.js, Apache Kafka, Elasticsearch, Redis, REST APIs, Docker, Microservices

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Databases: MongoDB, PostgreSQL, MySQL

Tools & Concepts: Git, AWS, Linux, Postman, Distributed Systems, System Design

EXPERIENCE

Urban Company

Software Development Engineer I, Fulfilment Team

Jul 2026 – Present

Gurugram, India

- Built a same-slot recovery engine that secures a replacement professional before a repeat no-show booking is cancelled, saving **15% of would-be cancellations (1,000+ bookings)** in the first two weeks).
- Automated the reschedule and cancellation flow, closing a loophole that lifted fee enforcement from **0.6% to 8–17% (16x)** and cut live-agent dependency from **93% to 10%**.
- Built provider-accountability checks that flag high-risk cancellations before they occur, making penalty and refund decisions fairer and more accurate.
- Improved reliability and correctness across flows handling **2M cancellations/month** through earlier recovery triggers, race-condition fixes, and safer cancellation guards.

Urban Company

Software Development Engineer Intern, Fulfilment Team

Jan 2026 – Jul 2026

Gurugram, India

- Centralized cancellation-fee logic into a single service and migrated **4+ systems** onto one source of truth governing **INR 16 Cr** of fee flow.
- Re-architected the provider-recovery pipeline, lifting recovery success from **33% to 42%** and safeguarding **1.1M accountability decisions** and **245K fee reversals**.
- Built and scaled a conversational cancellation assistant, increasing self-serve resolution and reducing manual agent handling.
- Automated fee handling across booking types and added retries and resiliency to critical services, improving reliability for **2M cancellations/month**.

AltBridge (Stealth Startup)

Software Development Engineer Intern, Project Lead

Oct 2025 – Dec 2025

Singapore (Remote)

- Led design and development of a core module for a stealth-stage startup, architecting backend workflows, building scalable APIs, and delivering the MVP end to end.

Orbol Group

Full-Stack Developer Intern (MERN)

Jun 2025 – Aug 2025

Remote

- Built a MERN gaming platform with user/admin panels, Clerk authentication, PhonePe payments, real-time leaderboards, and Riot Games/FACEIT API integrations for live player stats.

Centre for Development of Advanced Computing (C-DAC)

Software Development Intern, Performance Engineering

Jul 2024 – Sept 2024

Noida, India

- Built 5 Python performance-analysis tools and optimized an Nginx–Apache proxy layer, improving throughput by **30%** and reducing resource usage by **25%**.

PROJECTS

CareerPilot | *Next.js, PostgreSQL, Python, OpenAI API* | GitHub | Live

- AI career platform serving **200+ users**: resume and cover-letter generator, ATS score analyzer, and AI interview prep with **85% job-match accuracy**; aggregated job data from 10+ sites.

Renewable Energy Forecasting | *React, Flask, AWS, LSTM* | GitHub | Live

- Led team to **3rd place (Rs. 30,000 prize)** at Ahouba 2.0 Hackathon; LSTM models with **90% accuracy** for solar/wind forecasting, Flask backend deployed on AWS with a React dashboard used by 20+ operators.

ACHIEVEMENTS

Problem Solving: 300+ problems on LeetCode; 3-star rating on CodeChef

NPTEL: Top Performer (All India Rank), Programming in Python; completed Data Analytics with Python

Bihar Governor's Award: Scout/Guide Rajya Puraskar
